EVALUATION CRITERIA															
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
EVALUATE FROM 1-5 1 Insufficient 2 Enough 3 Sufficient 4 Good 5 Optimal															
Browsing and searching data, Evaluating data and managing data Browsing and searching data: This involves navigating through digital information to locate specific files, documents, or online content, typically using keywords or filters for efficient retrieval. Evaluating data and managing data: It entails assessing the quality, relevance, and accuracy of data, followed by organizing, storing, and maintaining data in a structured and secure manner to facilitate its effective use.	4	3	4	3	5	4	3	4	2	5	5	3	2	5	3
Developing digital content, Integrating and re-elaborating digital content and Copyright and licenses Developing digital content: This process involves creating and producing digital material, such as text, images, videos, or software, for various digital platforms and purposes. Integrating and re-elaborating digital content: It entails combining and modifying existing digital content to create new, unique works or to enhance the functionality and appeal of digital products or services. Copyright and licenses: These legal concepts govern the use and distribution of digital content by specifying the rights and restrictions applicable to content creators and users, helping protect intellectual property and regulate content sharing.	3	3	4	1	3	1	3	2	2	4	3	1	2	4	3
Interacting through digital technologies, Sharing through digital technologies, Creatively using digital technologies, Netiquette and Managing digital identity Interacting through digital technologies: Engaging with others using digital tools and platforms, such as social media, messaging apps, and video conferencing, to communicate, collaborate, or connect online. Sharing through digital technologies: The act of disseminating information, files, or content through digital means, enabling easy distribution and access to a wide audience. Creatively using digital technologies: Harnessing digital tools and software to express innovative ideas, produce art, or solve problems in imaginative and unconventional ways. Netiquette: Short for "internet etiquette," it refers to the rules and social norms that guide polite and respectful online behavior when communicating with others in digital environments. Managing digital identity: The practice of controlling and curating one's online presence, reputation, and personal information across various digital platforms to present a desired image and protect privacy.	4	3	4	3	4	2	2	3	4	4	4	3	2	5	2
Engaging in citizenship through digital technologies and Collaborating through digital technologies Engaging in citizenship through digital technologies: This involves actively participating in civic activities, such as voting, advocacy, or community involvement, by leveraging digital tools and platforms to promote social and political change. Collaborating through digital technologies: It signifies working together with others using digital tools and platforms to achieve common goals, whether in business, education, research, or creative projects, fostering teamwork and innovation in virtual spaces.	4	3	3	2	3	3	2	3	4	3	4	3	2	5	2
